

DR. ALI FALLAH

Assistant Professor | Automotive Engineering | Atılım University

Ankara, Türkiye | +90 531 245 9164 | ali.fallah@atilim.edu.tr | ali.fallah.66@gmail.com

ACADEMIC PROFILE

Interdisciplinary mechanical engineer working at the intersection of computational mechanics, additive manufacturing and 4D printing, programmable materials, and scientific machine learning. His research integrates finite-element and constitutive modelling, multiscale mechanics, experimental characterization, physics-informed machine learning, neural operators, and digital twins to **advance zero-defect manufacturing, resource-efficient design**, and multifunctional, adaptive, and reusable structures. He has authored more than 50 scholarly publications, attracting more than 1,800 citations with an h-index of 22, and has extensive experience in competitively funded research, interdisciplinary collaboration, postgraduate supervision, curriculum development, and teaching across mechanics, manufacturing, and computational engineering.

KEY ACHIEVEMENTS

- More than 50 scholarly publications; Google Scholar: ~1,850 citations and h-index 22; Scopus: 1,530 citations and h-index 20; Web of Science: 1,372 citations and h-index 19 (August 2026).
- Research published in leading journals across mechanics, materials, manufacturing, and biomedical engineering, including Chemical Engineering Journal, Composites Part A, Composites Part B, International Journal of Solids and Structures, International Journal of Mechanical Sciences, Composite Structures, and Advanced Composites and Hybrid Materials.
- Principal Investigator of a completed TÜBİTAK 1001 project on 4D-printed smart electro-active and load-bearing composites (~US\$200,000), with further roles in national and bilateral research programs.
- More than 150 manuscript reviews for international journals; supervision and mentoring across postdoctoral, doctoral, master's, and undergraduate research; development of two approved undergraduate courses.

ACADEMIC APPOINTMENTS

2025–present	Assistant Professor, Department of Automotive Engineering Atılım University, Ankara, Türkiye
2021–2025	Researcher and Principal Investigator, Integrated Manufacturing Technologies Research and Application Center Sabancı University, İstanbul, Türkiye • Led a TÜBİTAK-funded program on 4D-printed electro-active and load-bearing composite structures.
2019–2021	Postdoctoral Researcher, Faculty of Engineering and Natural Sciences Sabancı University, İstanbul, Türkiye • Contributed to the Bone Bricks project on modular osseointegrated prostheses for large bone-loss surgery.

EDUCATION

2017	PhD, Mechanical Engineering Sharif University of Technology CGPA: 4.00/4.00
2011	MSc, Mechanical Engineering Sharif University of Technology CGPA: 4.00/4.00
2009	BSc, Mechanical Engineering Amirkabir University of Technology CGPA: 3.71/4.00

RESEARCH AREAS

Advanced Manufacturing & Materials

Additive and 4D manufacturing; shape-memory polymers; continuous-fiber and multimaterial composites; architected, auxetic, and phononic materials; recoverable energy absorbers

Computational & Applied Mechanics

Finite-element analysis; nonlinear constitutive modelling; micromechanics and homogenization; multiscale and multiphysics modelling; structural dynamics, vibration, stability, and buckling

Scientific Machine Learning & Digital Engineering

Physics-informed neural networks; neural operators; hybrid physics/data-driven modelling; surrogate modelling; inverse design; digital twins and AI-enabled process–structure–property prediction

RESEARCH FUNDING AND PROJECTS

Period	Scheme	Project	Role	Status
2021–2024	TÜBİTAK 1001	4D-Printed Smart Electro-Active and Load-Bearing Composite Structures with In-Field Shape Recovery	Principal Investigator	Completed
2026–2029	TÜBİTAK 1001	Physics-Informed Digital Twin for Rapid Defect Detection and Mitigation via G-Code Optimization in Directed Energy Deposition	Principal Investigator	Accepted waiting for start
2026–2029	TÜBİTAK 1001	Innovative Integrated Design and 4D Printing of Phononic Sandwich Composites with Tunable Bandgap Behavior	Researcher	Ongoing
2026–2029	TÜBİTAK 1001	Design and Development of a Novel Soft-Legged Mobile Robot	Researcher	Ongoing

Selected submitted proposals

- 4D Printing of Advanced Intelligent Food-Packaging Systems, Türkiye–Greece TÜBİTAK 2520, Project Coordinator (submitted 2025).
- Integrated Additively Manufactured Sensing System for Marine Applications — Türkiye–Greece TÜBİTAK 2520, Researcher (submitted 2025).

SELECTED PUBLICATIONS

Selected from the complete publication list provided in the appendix.

TEACHING EXPERIENCE AND CURRICULUM DEVELOPMENT

2025–present

Assistant Professor, Atılım University

Undergraduate teaching in the English-medium Automotive Engineering program

- Courses include Introduction to Additive Manufacturing, Vehicle Dynamics, Chassis Design, Manufacturing and Materials Technology, and Capstone Design.
- Integrates theory with ANSYS, MATLAB, Python, nTop, laboratory activities, additive manufacturing, open-ended projects, and responsible use of AI tools.
- Recent course-evaluation scores include 5.00/5.00 in Introduction to Additive Manufacturing and Vehicle Dynamics, 4.79/5.00 in Chassis Design, and 4.67/5.00 in Manufacturing and Materials Technology.

Curriculum

Program-level educational contributions

- Developed Introduction to Additive Manufacturing and Physics-Informed Machine Learning for Engineering Applications; both approved by the Faculty Education Committee and incorporated into the curriculum.
- Helped restructure the departmental capstone framework to strengthen supervision, student–supervisor interaction, and consistency in assessment.
- Contributed to MÜDEK accreditation and quality assurance, including outcome-based education, curriculum assessment, and continuous improvement aligned with ABET and ENAEE principles.

RESEARCH SUPERVISION AND MENTORING

Supervision, co-supervision, and mentoring of postdoctoral researchers and PhD, MSc, and undergraduate students in computational mechanics, additive manufacturing, smart materials, and scientific machine learning. Student collaborations have contributed to peer-reviewed journal articles, conference papers, funded undergraduate projects, and continuing research activities.

INVITED TALKS AND SCIENTIFIC SEMINARS

16 Apr 2026

Scientific Machine Learning for Engineering Applications

Atılım University, Department of Automotive Engineering (in person)

3 Apr 2026

Physics-Informed Machine Learning for Engineering Applications: From PINNs to Neural Operators

Gebze Technical University, Department of Mechanical Engineering (online)

3 Jan 2025

Design, Modelling, and 4D Printing of Smart Composite Structures for Load-Bearing Applications

İzmir Institute of Technology, Department of Mechanical Engineering (online)

6 Nov 2024

Design, Modelling, and 4D Printing of Smart Composite Structures for Load-Bearing Applications

University of Pavia, Laboratory of Programmable Materials and Structures (online)

PROFESSIONAL SERVICE

- Reviewer of more than 150 manuscripts for international journals and conferences in mechanical engineering, materials, manufacturing, computational modelling, and scientific machine learning.
- Selected journals reviewed for include Additive Manufacturing, Engineering Applications of Artificial Intelligence, Composites Part B, Composites Part A, International Journal of Mechanical Sciences, Applied Mathematical Modelling, Engineering with Computers, Virtual and Physical Prototyping, Mechanics Based Design of Structures and Machines, Advanced Healthcare Materials, and Journal of Composite Materials.
- Member of master's and doctoral thesis examination committees at universities in Türkiye and abroad, with additional committee appointments scheduled.
- Co-organizer of the **Symposium on Physics-Informed Machine Learning** at the International Conference of Numerical Analysis and Applied Mathematics (ICNAAM 2026).

TECHNICAL AND EXPERIMENTAL EXPERTISE

Computation	ABAQUS (UMAT/VUMAT and user subroutines); ANSYS Workbench; MATLAB; Python; C/C++; Fortran; finite-element, finite-difference, GDQ, and extended Kantorovich methods
AI & Digital	Physics-informed neural networks; DeepONet and Fourier neural operators; deep learning; surrogate modelling; inverse design; digital twins; scientific-computing workflow development
Design & Manufacturing	SolidWorks; Rhino/Grasshopper; nTop; FDM/FFF and SLA additive manufacturing; design for additive manufacturing; multimaterial and continuous-fiber printing
Characterization	Mechanical testing; dynamic mechanical analysis; experimental characterization of smart, composite, and architected structures
